EDUCATION

New Jersey Institute of Technology — **Newark, NJ**
BS in Computer Science — *Magna Cum Laude (3.7 GPA)*

WORK EXPERIENCE

EarthCam — **Upper-Saddle River, NJ**
Junior Software Developer — *Oct 2025 – Oct 2026*

- Owned end-to-end development of full-stack features, defining requirements with business executives, and delivering production ready deployments in Agile sprints.
- Optimized backend performance ~5x on average by refactoring legacy business logic, rewriting complex SQL/Eloquent relationships, and fixing N+1 queries with eager loading and batching.
- Engineered RESTful APIs using Laravel, PHP, SQL, TypeScript, React, Python, FastAPI, Eloquent ORM, and database migrations.
- Mentored junior engineers and led summer intern cohort, enforced code quality through code reviews and QA validation, while authoring Swagger API and internal documentation for CSM and CRM teams.

Broadridge Financial Solutions — **Newark, NJ**
Software Quality Assurance Intern — *June 2024 – Aug 2024*

- Automated 40+ new test cases using Java, Selenium, Serenity, Cucumber and Gherkin in an Agile environment.
- Reduced test failures by 70% by triaging and debugging issues within a Java Spring Boot codebase.
- Strengthened test pipeline supporting thousands of test cases, improving reliability and speed by ~20% using Maven, Jira, and Xray.

Harmon Face Values — **Totowa, NJ**
Supply Chain Analyst & Engineer — *June 2022 – Aug 2022*

- Analyzed warehouse productivity data using IBM Cognos, processing daily sales and work logs to assess performance trends and gaps across multiple branch locations.
- Generated KPI reports highlighting employee productivity, sales performance, and operational inefficiencies to support management decision making and warehouse efficiency.

PROJECTS

RDE Medical Adherence Application | *AWS EC2, MySQL, Adobe ColdFusion*

- Engineered a cloud-based web application as a capstone project to improve medical adherence for patients, utilizing Amazon EC2 for server infrastructure, MySQL for database management, and Adobe ColdFusion for backend functionality.
- Collaborated with a cross-functional Agile team to provide an intuitive patient dashboard for scheduling, managing, and tracking medication reminders in compliance with RDE and healthcare standards.

Waylink | *Spring Boot, PostgreSQL, Docker, WebSockets, RESTful APIs*

- Developed a RESTful API for a URL Shortener service with Spring Boot and PostgreSQL, featuring OAuth 2.0 user authentication, access control protocols via Spring Security, and an MVC architecture for scalable design.
- Containerized the application with Docker for consistent deployments and integrated WebSockets to deliver real-time data analytics on URL clicks and user activity.

Marelli (E-Commerce Platform) | *SQL, PHP, HTML, CSS, GitHub Actions*

- Built an e-commerce platform implementing hashed authentication and checkout flow.
- Enhanced security and managed relational databases containing inventory, users, and transactions using SQL and PHP.
- Automated CI/CD pipelines via GitHub Actions to construct automated workflows and deploy directly from GitHub.

SKILLS

Languages: Java, C++, C, SQL JavaScript, TypeScript, Bash, PHP, Python, HTML/CSS

Frameworks/Libraries: Spring Boot, Laravel, React, Next.js, Node.js, FastAPI, Flask, JPA/Hibernate, Selenium, Serenity, Cucumber

Other(s): AWS, Git, UNIX, CI/CD (Jenkins), Docker, ORMs, Query Optimization, Performance Tuning, Gherkin, Agile/Scrum, Code Review, Data Structure & Algorithms, REST APIs, WebSockets, Microservices,

AWARDS & CERTIFICATIONS

Certifications:
AWS Certified Solutions Architect Associate *(2026),* AWS Certified Cloud Practitioner *(2026)*

Awards:
2nd Place Senior Capstone *(Medical Adherence Application under RDE Systems),* NJIT Dean's List *(Sept 2020 – June 2025)*
