EDUCATION

New Jersey Institute of Technology

BS in Computer Science

Newark, NJ

Magna Cum Laude (3.7 GPA)

WORK EXPERIENCE

EarthCam

Junior Software Developer

Upper Saddle River, NJ

Oct 2025 – Present

- Led end-to-end development of independent projects, defining requirements directly with a team of business executives, and delivering production-ready deployments in an Agile environment.
- Optimized backend performance by ~5x on average through refactoring legacy business logic and complex SQL/ORM relationships.
- Engineered RESTful APIs and full-stack features using Laravel, PHP, SQL, TypeScript, Eloquent ORM, and database migrations.
- Mentored new engineers, enforced code quality through code reviews and QA validation, while authoring Swagger API and internal documentation for CSM and CRM teams.

Broadridge Financial Solutions

Software Quality Assurance Intern

Newark, NJ

June 2024 – Aug 2024

- Automated test cases using Java, Selenium, Serenity, Cucumber and Gherkin in an Agile environment.
- Reduced test case errors by 70% by triaging failures and debugging issues within a Java Spring Boot codebase.
- Delivered hands-on training to newly hired QA engineers, accelerating their proficiency in AWS services and internal QA tools.
- Optimized data pipeline supporting thousands of user test cases, improving scalability and reliability using Maven, JIRA, and Xray.

Harmon Face Values

Supply Chain Analyst & Engineer

Totowa, NJ

June 2022 – July 2022

- Analyzed warehouse productivity data using IBM Cognos to assess performance gaps across multiple branch locations.
- Processed 5,000+ daily work & sales records to build key point indicators to inform leadership on inventory and labor efficiency.
- Monitored warehouse operations and proposed new data-driven solutions, improving workplace efficiency by 13% and advocated these solutions through weekly team meetings.

PROJECTS

RDE Medical Adherence Application | AWS EC2, MySQL, Adobe Coldfusion

- Engineered a cloud-based web application as a capstone project to improve medical adherence for patients, utilizing Amazon EC2 for server infrastructure, MySQL for database management, and Adobe ColdFusion for backend functionality.
- Collaborated with a cross-functional Agile team to provide an intuitive patient dashboard for scheduling, managing, and tracking medication reminders in compliance with RDE and healthcare standards.

Waylink | Spring Boot, PostgreSQL, Docker, WebSockets, RESTful APIs

- Developed a RESTful API for a URL Shortener service with Spring Boot and PostgreSQL, featuring OAuth2 user authentication, access control protocols via Spring Security, and an MVC architecture for scalable design.
- Containerized the application with Docker for consistent deployments and integrated WebSockets to deliver real-time data analytics on URL clicks and user activity.

Marelli | SQL, PHP, HTML, CSS, GitHub Actions

- Built an e-commerce platform implementing hashed authentication and payment credential handling.
- Enhanced security and managed relational databases containing inventory, users, and transactions using SQL and PHP.
- Automated CI/CD pipelines via GitHub Actions to construct automated workflows and deploy directly from GitHub.

SKILLS

Languages: C++, C#, C, Python, PHP, SQL, Java, Lua, HTML, CSS, JavaScript, AJAX, Bash, Kotlin

Other(s): Spring Boot, React, Node.js, Docker, RESTful APIs, WebSockets, Git, Maven, Microservices, Selenium, Serenity, Cucumber, Gherkin, JIRA, Next.js, Confluence, UNIX, PyTorch, Agile, SCRUM, ORM, JPA, Hibernate, CI/CD (GitHub Actions, Jenkins)

AWARDS

NJIT Dean's List

Maintained a GPA of 3.00 or better after completing 12 or more credits per semester.

September 2020 – June 2025

2nd Place Senior Capstone Project

Awarded for our Capstone Project under RDE Systems for developing a medical adherence application.

May 2025
